

KAMLESH KUMAR

AI/ML Engineer | Deep Learning | LLM & RAG | FastAPI

+91-9696160943 | kk919844@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Noida, India

PROFESSIONAL SUMMARY

AI/ML Engineer experienced in developing and deploying scalable ML and LLM-based systems. Skilled in FastAPI, RAG pipelines, and deep learning using PyTorch and Hugging Face. Promoted from Intern to Full-Time Developer at Trayistats for delivering high-impact production solutions.

TECHNICAL SKILLS

Programming: Python

Data Analysis & Visualization: NumPy, Pandas, Matplotlib, Seaborn

AI / ML: Scikit-learn, PyTorch, TensorFlow, Transformers

LLM / GenAI: LangChain, RAG, Ollama, Hugging Face, FAISS, ChromaDB

Backend & MLOps: FastAPI, REST APIs, Docker, MLflow, GitHub Actions

Databases & Cloud: PostgreSQL, Vector DBs, AWS (EC2, S3)

Tools: Git, GitHub

PROFESSIONAL EXPERIENCE

Python AI/ML Developer - *Trayistats AI Technology* · Noida, India

- Developed **IPRanker**, a production-grade ML/DL system processing **~50,000+ IP requests/day** for real-time detection of malicious traffic (VPN, TOR, proxy)
- Monitored and managed production error logs, ensuring system reliability and rapid issue resolution
- Optimized ML pipelines for anomaly detection and user behavior analysis
- Performed database optimization (indexing, query tuning) for faster data retrieval in PostgreSQL
- Collaborated with cross-functional teams to deliver AI-driven business solutions

AI/ML Intern - *Trayistats AI Technology* · Noida, India

- Assisted in data preprocessing, feature engineering, and model evaluation
- Contributed to ML pipeline development

PROJECTS

IPRanker – Threat Detection System | *Python · scikit-learn · FastAPI · PostgreSQL*

- Built ML/DL-based system to classify and detect malicious IPs including VPN, TOR, and proxy sources
- Integrated real-time scoring and analysis via FastAPI backend REST endpoints

Personal AI Chatbot (RAG-based) | *LangChain · ChromaDB · Ollama · FastAPI*

- Built a context-aware chatbot using Retrieval-Augmented Generation (RAG) architecture
- Designed retrieval pipeline using ChromaDB as vector store for accurate document-based responses
- Integrated FastAPI backend for real-time user interaction and API access

House Price Prediction System | *Scikit-learn · Django · Python*

- Developed regression model with feature engineering and cross-validation for accurate price prediction
- Deployed as a Django web application with a user-friendly UI for real-time predictions

EDUCATION

Bachelor of Technology – Computer Science

2019 – 2023

AKTU University, Lucknow

CERTIFICATIONS

Machine Learning Specialization

Stanford University / Coursera
